

## **Car Rental Website**

Work by:

Eyad AlZahrani, Mishari Al Ajmi

**Under supervision:** 

Dr. Faisal Al-Otaibi

## **Car Rental Website**

Welcome! Today, We will be presenting our car rental website, showcasing its features and functionality. This website is designed to offer users a seamless and enjoyable experience when booking a car rental.

## Introduction to Our Car Rental Website

#### **User-Friendly**

This website boasts a userfriendly interface for a hassle-free booking process. You can easily search for cars, and finalize your reservation.

## Efficient vehicle management

The vehicles have been linked to a central control panel to monitor the status of the cars (available/rented), which we will discuss in detail later.

## Dynamic price management system

Prices are linked to the central panel, with the ability to modify prices according to demand or season (such as raising prices during peak times).

## Bookings and manage them easily

Real-time availability display system.

Possibility of blocking reservations when the car is under maintenance or unavailable.

#### Login/register system

Its for Better Customer
Management: It makes it
easier for management to
track customer data, and
make continuous service
improvements based on
needs and preferences. And
you can't pick any car until
you sign in successfully.

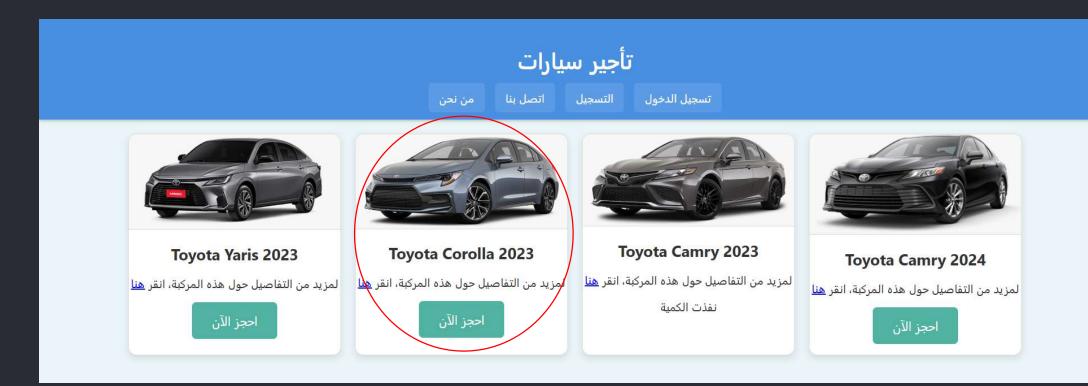

#### interior pages

It helps provide information about the company, its vision, mission and values, which builds trust with customers.

#### The available car

Here the rental system is displayed and the available vehicles, their price, and specifications are displayed

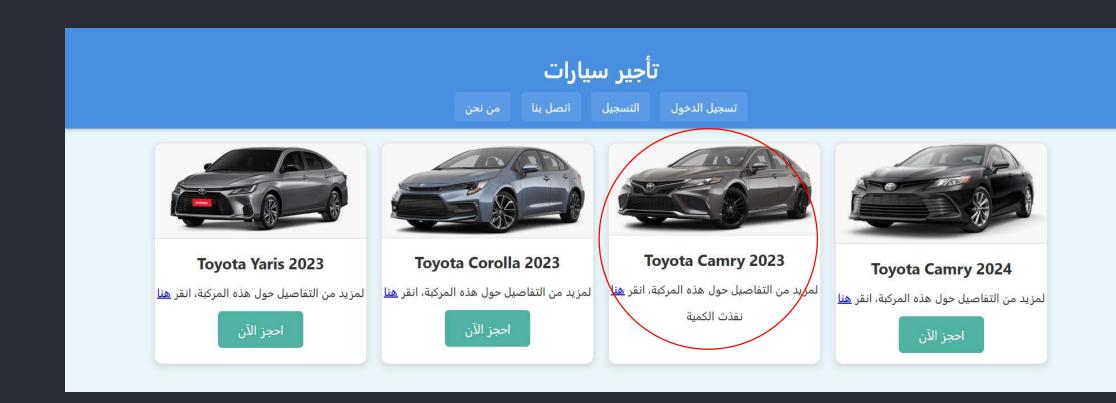

#### The available car

Here the rental system is displayed and the available vehicles, their price, and specifications are displayed

#### Add a point

If the vehicle is not available in stock, the reservation button is blocked using the PHP dynamic

#### Admin control panel

When you log in as an admin...

A hidden page will appear, called **Control Panel**.

It enables you to fully control your site and manage inventory with ease, as we will see in the following pages

Toyota Camry 2023 لمزيد من التفاصيل حول هذه المركبة، انقر <u>هنا</u> نفذت الكمية

#### Admin control panel

When you enter the control panel page, the first thing you will see is adding a vehicle.

Which will enable you to list your vehicles, with all their details.

Which will be instantly displayed on your site in the same format.

## لوحة التحكم الإدارية الصفحة الرئيسية لوحة التحكم تسجيل الخروج إضافة سيارة جديدة اسم السيارة: موديل السيارة: سعر السيارة: الكمية: صورة السيارة: No file chosen Choose File إضافة السيارة

#### Admin control panel

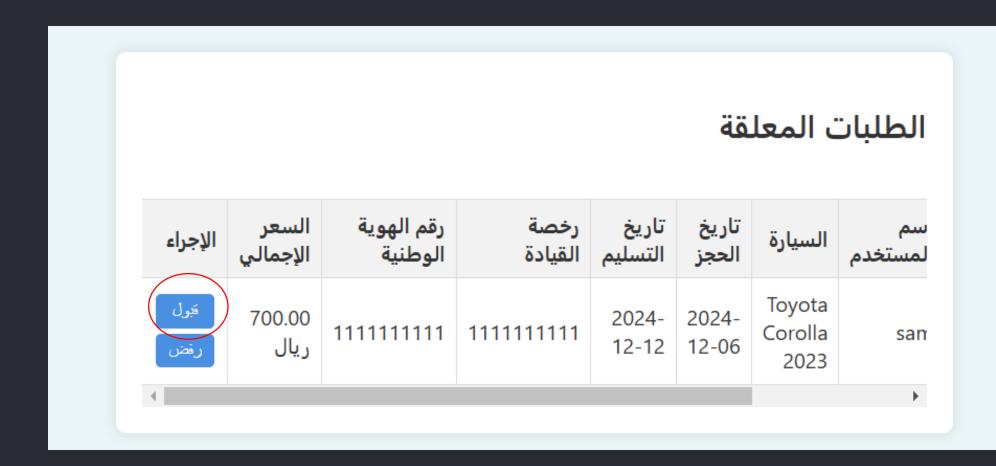

When you scroll down, you will see the pending orders with the ability to accept or reject them.

We have developed it to facilitate the ordering process, and we have not established payment processes until after approval, to avoid accidents such as the vehicle needing maintenance

#### Admin control panel

If the order is accepted,

#### Admin control panel

If the order is accepted,

The order status of "Accepted" will be displayed in the customer's order tracking page And the same goes for rejection

## in conclusion

This is the full explanation of the site. It is our first project as a team. The site needs some simple improvements and adding a payment gateway for the licensed company and it will be 100% ready.

## in conclusion

This is the full explanation of the site. It is our first project as a team. The site needs some simple improvements and adding a payment gateway for the licensed company and it will be 100% ready.

My colleagues and I aspire to develop it to include a sales program and make it work online to keep pace with the expansion and progress we are experiencing today.

Thank you for your time.
